

StudyVector Schools One-Page Overview

StudyVector supports GCSE and A-Level intervention with board-aligned practice, weak-topic visibility, and homework workflows. This one-page summary is for Heads of Department, SLT, and procurement teams.

How It Fits Intervention Workflows

- Assign targeted practice to classes or cohorts by topic and board.
- Use weak-area visibility to prioritise intervention groups before mocks.
- Review completion and accuracy without manual marking spreadsheets.

What Teachers and Leaders Can See

- Topic-level accuracy by class, subject, and year group.
- Homework completion and follow-up status for assigned tasks.
- Cohort snapshots for departmental and SLT review meetings.

How It Saves Marking and Admin Time

- Auto-marked practice with examiner-style feedback for objective items.
- Clear evidence trails for who attempted, where gaps persist, and what improved.
- Calmer student self-serve revision flow with dyslexia-aware mode available.

Rollout and Trial

- Pilot or full-cohort rollouts scoped by subject, key stage, and term timing.
- Request a free school trial and book a short implementation demo.
